COOPERATIVE AGREEMENT

Award # U69HA3396405

This project is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of the Year 2 award totaling \$6,000,000 with 0% financed with non-governmental sources. The contents are those of the authors and do not necessarily represent the official views of, nor an endorsement by, HRSA, HHS or the U.S. Government.

Objectives

- Explore the importance of partnership-building in establishing effective and sustainable data sharing practices within the EHE landscape
- 2 Identify key steps in building partnerships before data sharing occurs

Learn from other jurisdictions about the strategies they use to support the partnership-building process

Agenda

Understanding Partnerships

Key Steps in Building Partnerships for Data Sharing

Examples From The Field

Q&A

What Is a Partnership For Data Sharing?

- Partnerships are a collaboration between agencies/programs with a shared goal
- It is both structural and personal
- It is an ongoing relationship, not a one time activity
- There is an expectation to share data across participating agencies/programs

Poll #1

Which of the following best describes your current partnerships for data sharing?

What are some examples of current partnerships for data sharing in your jurisdiction?

Why should you develop a partnership for data sharing in your jurisdiction?

Why Should EHE-Funded Jurisdictions Develop Partnerships for Data Sharing?

- Current RWHAP activities and data may not be enough to fully understand the HIV landscape in your jurisdiction
- Data is crucial for EHE-funded jurisdictions to help both plan activities and measure progress to EHE goals
- Partnerships help you better understand the work that other agencies are doing, organizational culture and priorities and available data
- Eliminating silos, coordinating, and ensuring continuity of care are essential to improve health outcomes for people with HIV

Where Do Partnerships Fit in EHE Activities and Data Sharing?

Key Steps In Building Partnerships For Data Sharing

Identify a champion

Develop shared goals and expectations

Identify possible barriers

Identify available resources

Panelists

Let's Meet Our Panelists!

Office	Panelist
Florida Department of Health	Lorene Maddox, MPH Surveillance Data Analysis Manager HIV/AIDS Section
Louisiana Office of Public Health	Debbie Wendell, PhD, MPH Data Management/Analysis Unit Manager
North Carolina Department of Health and Human Services	Bradford Wheeler, MPH HIV Care Epidemiologist
Seattle and King County Public Health	Jake Ketchum Project/Program Manager IV - End the HIV Epidemic
New York City Department of Health	Anthony Romano Research Scientist

Questions and Answers

TAP-in Technical Assistance Offerings

- Support with partnership building and data sharing, including:
 - Identifying your data needs and gaps
 - Determining possible partnerships to support your EHE funded activities and goals
 - Identifying strategies to securing these partnerships
 - Identifying shared goals and interests
 - Identifying available resources and possible barriers
- TAP-in is working with 3 EHE jurisdictions in this area
